

## Rurban Lens brings health & wellness innovation to the equine industry.

We use **infrared thermography**, technology that has **been proven over 50 years**, combined with leading edge software, digital photography and video to produce non invasive diagnostic images for equine health assessments.

Our Equine Thermographer is a ISO / Certified Equine Thermographer Level I and has been trained by Equitherm UK.

This qualification is acknowledged by:  
UK Thermography Association,  
Institute of Equine Thermography,  
Veterinary Institute of Thermography UK  
The Institute of Infrared  
(Canada, Sweden, Norway, France, Britain, & Germany).

**Our company's objective is to contribute to, and move the equine wellness and health care industry forward through technical innovation.**

We are always on the lookout for how we can support other companies, professions and the health teams of equine owners also focused on improving equine health care through innovation.
